

Toyota Forklift Part

Toyota Forklift Parts - Since 1992, Toyota Material Handling inc., U.S.A., also known as TMHU, has been the top selling lift truck dealer in the United States. This business has been headquartered out of Irvine, California for well over 40 years, providing a comprehensive line of quality lift trucks. With a great reputation of durability and reliability, Toyota lift trucks have thrived in the competitive materials handling market. Quality is the cornerstone of Toyota's legendary Toyota Production System practiced at all manufacturing facilities, including TIEM, which is stands for Toyota Industrial Equipment Manufacturing, located in Columbus, Indiana. The bulk of the Toyota lift trucks sold in the U.S.A are built here.

Every one of Toyota's manufacturing facilities within Canada and the United States comply with the International Organization for Standardization or ISO 14001 standard. The Columbus TIEM plant has been honored on many occasions for its devotion to relentless development and its environmentally friendly systems. It is the first and only producer to offer EPA and CARB-certified Compressed Natural Gas powered lift trucks on the market. To illustrate, the Toyota 8-Series IC lift vehicles emit 70% fewer smog forming emissions than the current federal EPA standards and have complied with California's strict emission standards and regulations.

TMHU, U.S.A.- Leading the Industry

Brett Wood, President of TMHU, links Toyota's achievement to its strong dedication to constructing the best quality lift vehicles at the same time as delivering the utmost client service and assistance. "We must be able to learn and predict the needs of our customers," said Brett Wood. "As a leader, our success also depends on our ability to address our customers' operational, safety and environmental cost issues."• TMHU's parent company, Toyota Industries Corporation, often known as TICO, is listed in Fortune Magazine as the world's principal lift truck supplier and is amongst the magazines prominent World's Most Admired Companies.

Redefining Environmental Accountability

Toyota Industries Corporation, as the parent company, has instilled a rich company doctrine of environmental stewardship in Toyota. Not many other organizations and no other lift truck manufacturer can meet Toyota's history of protecting the environment while simultaneously encouraging the economy. Environmental responsibility is a fundamental characteristic of corporate decision making at Toyota and they are proud to be the first and only producer to offer UL-listed, EPA- and CARB-certified Compressed Natural Gas powered lift vehicles. Yet an added reason they remain a leader within the industry.

Toyota first released the 8-Series line of lift trucks in 2006, yet again exhibiting its leadership and innovation in the industry. Featuring an exclusive emission system that eclipsed both Federal EPA emission principles, and California's more environmentally friendly emission standards. The finished invention is a lift truck that produces 70% fewer smog forming emissions than the existing Federal standards allow.

Also starting in 2006, collectively with the Arbor Day Foundation, Toyota added to its dedication to the environment. To this day more than 58,000 trees have been embedded in the ground throughout state forests and community parks that were damaged by fires and other ecological causes. 10,500 seedlings have also been circulated through Toyota Industrial Equipment's network of dealers to non-profit organizations and neighborhood consumers to help sustain communities all over the United States

Toyota's lift trucks offer superior strength, visibility, efficiency, ergonomics, and all the foremost safety equipment that has made Toyota an industry leader. The company's System of Active Stability, also known as "SAS"•, helps lessen the possibility of incidents and injuries, in addition to increasing productivity levels while minimizing the potential for product and equipment breakage.

System Active Stability is able to sense situations that might lead to lateral volatility and potential lateral overturn. When any of these conditions have been detected, the SAS will instantaneously engage the Swing Lock Cylinder to re-stabilize the rear axle. This transitions the lift truck's stability trajectory from triangular in shape to rectangular, offering a major increase in stability which substantially reduces the probability of a mishap from a lateral overturn. The Active Mast Function Controller or the Active Control Rear Stabilizer also helps to avoid injuries or accidents while adding durability.

SAS was first launched to the market on the 7-Series internal combustion products in 1999 and subsequently catapulted Toyota into the industry leader for safety. Since then, SAS have been integrated into most of Toyota's internal combustion products. It is standard equipment on the new 8-Series. There are more than 100,000 SAS-equipped lift vehicles in operation, exceeding 450 million hours combined. The increased population of SAS-equipped trucks in the field, along with compulsory worker training, overturn fatalities across all models have decreased by 13.6% since 1999. Additionally, there has been an overall 35.5% drop in industry wide collisions, loss of control, falls and tip overs from a lift vehicle for the same period.

Toyota's pattern of excellence reaches far beyond its technological achievements. The company maintains an extensive Operator Safety Training curriculum to help users meet OSHA standard 1910.178. Instruction courses, video lessons and various materials, covering a wide scope of subjects-from personal safety, to OSHA regulations, to surface and load situations, are offered through the seller network.

Since the transaction of its first lift vehicle in the U.S. to the manufacture of its 350,000th lift truck produced in 2009 at Toyota Industrial Equipment Manufacturing, TMHU has sustained a solid presence in the U.S. This fact is demonstrated by the statistic that 99% of Toyota lift trucks bought in America at the moment are manufactured in the United States.

Based in Columbus, Ind., the Toyota Industrial Equipment Mfg. campus equals 998,000 square feet of facilities across 126 acres. Facilities include a National Customer Center, as well as manufacturing operations and supply centers for equipment and service

components, with the entire investment exceeding \$113 million dollars.

The modern NCC was built to operate for TMHU customers and dealers. The facility includes a 360-degree display room, a presentation theater complete with stadium seating for 32, an section for live product demonstrations with seating capability for 120; a presentation theater; Toyota's Hall of Fame showcasing Toyota's history since the birth of its originator, Sakichi Toyoda, in 1867, and lastly a training center.

TMHU has 68 authorized industrial equipment dealers, along with 189 dealership locations all through the United States, offering the most comprehensive and inclusive client support and customer service in the industry. The company's new and Licensed Used lift trucks, service, components, and financing features make Toyota dealerships a one-stop shop to guarantee total consumer satisfaction.
