The U.S. lift Truck division located in Cleveland has a professional team experienced in Sales, Purchasing, Marketing, Logistical and Technical Support.

Korea's original domestic forklift marketplace was an open-import enterprise. In the 1960's, Korea Machinery Co. Ltd. started to import assembled lift trucks as part of a national equipment expansion venture. Early product sales of this industrialized equipment focused on large business groups, the armed forces and on state-run companies. This ultimately led to a merger with Daewoo Heavy Industries Ltd. In 1976, the Forklift Division commenced business operations throughout Korea to overhaul and sell this heavy equipment. By 1978, a forklift manufacturing plant was successfully completed. Continuous technical education became the new focus for improving quality and product development.

Daewoo began the first domestic lift truck business in 1967, and quickly gained a massive 90% share in the Korean Materials Handling market. By the 1980's, Daewoo's superior technological advancements combined with sales success placed them in a position of substantial growth of their lift truck business.

In 1981, Caterpillar Industrial Inc. of the United States, proposed a cooperative enterprise project to counter act competitive pressures in the US materials handling industry. This plan radically expanded Daewoo's forklift sales. Construction was completed in 1984 to facilitate a new plant which helped set up the business for the manufacture of high end added-value products suited for export. In 1993, the corporation had a international sales system and started exporting models they had established through in-house technology, as an independent brand. Certifications were then acquired from CE of Europe, UL of the United States and ISO 14001 and ISO 9001, securing growth opportunities into international marketplaces.
